

Indiana DNR, Division of Forestry  
Community & Urban Forestry

Trees for restricted spaces with width and spread of 25 feet or less  
Pam Louks, State Urban Forestry Coordinator  
317-915-9390; plouks@dnr.IN.gov

Common name	Scientific name	Cultivar name	Height	Width
			in feet	in feet
Amur Maple	Acer <i>ginnala</i>		15' to 20'	same
Amur Maple 'Betzam'	Acer <i>ginnala</i>	Beethoven	20-25	15-20
Amur Maple 'Mozzam'	Acer <i>ginnala</i>	Mozart	20-25	15-20
Tatarian Maple	Acer <i>tataricum</i>	TreeForm	15-25	15-25
Serviceberry	Amelanchier <i>canadensis</i>			
Serviceberry 'Refzam'	Amelanchier <i>canadensis</i>	Reflection	20-25	10 to 15
Serviceberry 'Sprizam'	Amelanchier <i>canadensis</i>	Sprizam	10 to 15	8 to 10
Serviceberry 'Autumn Brilliance'	Amelanchier <i>x grandiflora</i>	Autumn Brilliance	20 to 25	15 to 18
Serviceberry 'Robin Hill'	Amelanchier <i>x grandiflora</i>	Robin Hill Tree Form	20 to 25	12 to 15
Dogwood 'Rutcan'	Cornus <i>kousa x C. florida</i>	Constellation	22 to 25	22 to 25
Cherry, Snow Goose	Prunus <i>Snow Goose'</i>		20 to 25	20 to 25
Japanese Tree Lilac, Summer Snow	<i>Syringa reticulata</i>	Summer Snow	20 to 25	20 to 25
Callery Pear 'Jilzam'	<i>Pyrus calleryana</i>	Tree Form Jill

Henry Gerhold, Penn State University  
and "Trees for Urban and Suburban Landscapes"  
Dr. Ed Gilman

Always be sure to check if trees are tolerant to urban stresses such as salts, compacted soil, restricted rooting space, pollution etc. Most of these trees are tolerant, but some sites may have more than the usual stresses, so, protect your investment and check. The above references can help, or you can call the urban forestry office for additional information on specific trees. Also, be sure to specify tree form for some of these trees.
